and Mapping
Rochester Engineering Society

Dear Fellow Surveyors:

Enclosed you will find a list of inactive surveyors or dissolved corporations indicating possible location of their survey maps or field records. This list is obviously not complete and contains surveyors only in Monroe County area. I would like to expand the list to other counties within GVLSA region, but I depend entirely on your information. Please let me know where maps and other records are, not listed hereon, of other retired or deceased surveyors and correct possible mistakes or missing information in this list. I believe that surveyors will cooperate with each other giving available information, but we did not make any specific arrangements.

During research for this list, I found out that City of Rochester, D. P. W. Precise Survey Section has various old maps of the City of Rochester grouped within each district and also maps within Monroe County, grouped separately for each Town. Even though said maps are not indexed, it is worth going through all given Town or City district and you might find some maps of value to your present survey.

So, please open your files to other surveyors for the benefit of all.

I will be waiting for additional information.

Very truly yours,

Paul Slapelis
